Gitesh Sutar

Java Backend Developer

PROFESSIONAL SUMMARY

Dynamic Java Backend Developer with expertise in Java, Spring, and Hibernate, specializing in creating efficient APIs and server-side solutions. Demonstrates excellent problem-solving and teamwork skills, with the capability to optimize backend systems for performance. Proficient in using Generative AI and rapidly learning new technologies.

WORK EXPERIENCE

Masai School

Instructional Associate (Contract)
September 24 - March 25

Job responsibilities:

- Enhanced students' problem-solving and coding skills, aligning with backend development through guidance in Data Structures and Algorithms.
- Conducted weekly feedback sessions with the curriculum team to refine teaching methodologies and improve student engagement.

Skillovilla

Backend Curriculum Associate
February 24 - May 24

Job responsibilities:

- creating storyboard for java topics, writing scripts and creating power point presentations and recording demos.

PROJECTS

1. Astra Bank | |

Springboot | MySQL | HTML5 | JavaScript | CSS |
Spring Security | JWT | Hibernate

- Developed a user-friendly banking application using Java and Spring Boot ensuring reliable server-side functionality.
- Implemented security features such as card management, transaction tracking, authentication, and authorization using Spring Security and JWT.

2. Starsync | |

Angular | Flask | Python

- Developed a project management system using Angular and Flask, focusing on efficient backend solutions.
- Implemented user role-specific features ensuring seamless integration with frontend components.
